## PROFILE

---

Highly motivated and passionate front-end web developer with an understanding of languages, libraries and databases including HTML5, CSS3, SASS, JavaScript, MongoDB and React. Mainly focused on developing programming abilities and delivering a well-structured, functional code. Currently seeking an opportunity to work with a company that will offer room to grow and learn new things for development and career progression.

## EXPERIENCE

---

### Freelancing

**Freelance | January 2021 - Present**

For the past few months, I have been developing my programming skills, setting myself goals and working on projects. Even though I haven't acquired any professional experience, my genuine desire to learn and passion for programming/coding push me towards starting a professional career.

## EDUCATION

---

### Certificate of Higher Education - Forensic Investigation

**Coventry University, Coventry | Sep 2018 - May 2020**

**Modules studied:** Data collection and presentation skills; Investigative practice; Critical and digital communication; Professional development.

### A-levels, BTEC

**Cardinal Wiseman School (Sixth Form), Coventry | Sep 2015 - May 2018**

A-levels: Polish A2 (A\*)

**BTEC:** Business Studies level 3 (D); Media Studies level 3 (M); Applied Science level 3 (M)

### GCSE

**Cardinal Wiseman School, Coventry | Sep 2013 - June 2015**

7 GCSE grades A-C including English, Math and Science

---

## KEY SKILLS

---

- **HTML5; CSS3; SASS**
- **JavaScript; Express.js; Node.js**
- **React; GSAP**
- **MongoDB, Mongoose**
- **Version Control - Git**
- **GitHub**
- **Attention to detail**
- **Bilingualism - English and Polish**
- **Time Management**
- **Problem Solving**

---

## INTERESTS

---

My interests mostly revolve around music including music theory, writing music, and playing a guitar. I find it not only rewarding and satisfying but also relaxing. Playing an instrument, similarly to programming, teaches determination and patience. I also love to follow online trends related to technology, cybersecurity, and its development. During my spare time I like to work on projects related to web applications, write music and workout at the gym.

---

## COURSES

---

### **The Web Developer Bootcamp 2021 by Colt Steele**

- This is an Udemy course taught by a professional bootcamp instructor with a track record of success. It teaches the very basic and foundation of modern web development but also goes into much more detail in some cases. It covers topics such as AJAX; Async JavaScript; NPM; Node.js; REST; Responsive design.

### **The Modern React Bootcamp (Hooks, Context, Next.js, Router)**

- Another Udemy course taught by a professional boot camp instructor - Colt Steele. I found it very comprehensive and good at explaining fundamentals of the React. It goes through many different topics such as Next.js; Hooks; Context API.

### **The Git & GitHub Bootcamp**

- Another boot camp found on Udemy that helped me understand the essentials of Git and GitHub such branching, adding, committing, merging and resolving conflicts.
